

Hangklip Hardcore Hackers

Chris Geldenhuys reported as follows re the Hardcore Hackers April activities: "There were 9 hack opportunities in April, of which one opportunity was rained out, with a total of 210 man-days. The HHH Team achieved significant progress across multiple locations this month, including clearing Pines Plot 559/60 and partially 149, tackling challenging undergrowth in Bass Road, minimising Spider Gums during the 20 th Hack at M-Plot and clearing an area of more than 4-5 rugby fields of Hakea in the Buffelstal Valley. At FCE, it was the normal heavy duty in our efforts to clear the Buffels River from aliens. Chris goes on to report: "The Hangklip Sugarbird Work Team is nearing the end of their second task at the Bottlebrush farm, achieved great productivity, and will be taking on the more challenging areas of the Hakea hack of the 3rd task. The team's contribution is greatly appreciated, and to Mike Christellis, thank you for monitoring and acting as liaison between HHH and the Sugarbird Foundation." Chris goes on to report that the HHH Management Team met with the Management Team of the Sugarbird Project under the leadership of Sandy Van Hoogstraten and Maya on the 1st May 2026 to sort out working procedures and express our admiration and appreciation for this wonderful opportunity, where this initiative is a win-win situation for all. We provide the plan, requirements and team; the Sugarbird Project provides the funding, and the team is getting the remuneration and Nature blossoms! Hangklip Hardcore Hackers May 2026. What more do you want? It is a Win-Win for everybody. The relationship with the Sugarbird Foundation is so important for alien clearing in the Hangklip area, and thanks to Chris and his team for this wonderful initiative that is truly blossoming.
